

INDUSTRY-LEADING TECHNOLOGY. COMPREHENSIVE, CERTIFIED SERVICES.

Horizon Energy Solutions has the experience, certifications, expertise and industry-leading technology to take care of all your metering requirements. You can count on us to provide reliable, cost-effective and worry-free metering service throughout the entire process, from installation, to measurement, to ongoing management.

As one of Canada's leading providers of metering management, we offer a full range of certified services and advanced expertise. Today, we service over a quarter million meters for residential, industrial and wholesale customers throughout Ontario. Our wireless services provide customers with the latest in accurate, efficient metering technology.

A HORIZON COMPANY

As part of the Horizon family of companies, Horizon Energy Solutions Inc. shares an impressive track record of customer service, commitment to community and far-sighted innovation in sustainable development. Horizon Energy Solutions is a sister company to Horizon Utilities Corporation, one of the largest, most successful and dynamic local distribution companies in Ontario. The Canadian Electricity Association named the Horizon group of companies "Sustainability Company of the Year".

PROVIDING UNPARALLELED SERVICES, CERTIFICATION, EXPERTISE AND TECHNOLOGY.

Only Horizon Energy Solutions provides a comprehensive range of certified services, advanced expertise, leading secure wireless technology and rapid customer service.

FROM INSTALLATION TO COLLECTION TO CALIBRATION, HORIZON OFFERS **EVERYTHING YOU NEED.**

Horizon Energy Solutions provides a complete range of metering services for residential, commercial industrial, utilities and wholesale customers. Our complete, turnkey program covers the entire metering value chain, including:

- **METER INSTALLATION:**
metering cabinet fabrication, new installations and upgrades, registration, IESO and Measurement Canada compliance audits and inspection
- **METER DATA COLLECTION AND MANAGEMENT:**
wireless metering communication and solutions, testing of device communication, validation, aggregations, storage, communication and settlement
- **METER CALIBRATION AND MAINTENANCE:**
sealing, meter programming, module upgrades, MV90 services and certification of circuit analyzers and field test equipment

COMPREHENSIVE CERTIFICATION

- Registered with the Independent Electricity System Operator (IESO) as a Meter Service Provider (MSP)
- Measurement Canada certified - Meter Sealing Organization
- Fully certified metering journeyman
- ISO 9001:2008, 14001, 26000 - certified*
- Global Reporting Initiative™ A+

LEADING EXPERTISE

- Over 100 years of utility grade metering experience in both service and meter sealing
- Unparalleled knowledge of industry trends through direct involvement with the Canadian Electricity Association (CEA), the Electricity Distribution Association (EDA), as well as several IESO working groups
- Advanced four-year training plus ongoing retraining for all journeymen, including metering and sealing agents
- Advanced installation process using the highest quality inputs

ADVANCED, SECURE WIRELESS SERVICES

Wireless metering is providing customers with a new and effective way to increase accuracy and reliability while reducing costs. Our wireless service provides:

- Seamless transfer from analogue to digital without changing metering assets or incurring large implementation costs
- Remote capabilities for locating and mitigating metering faults and 24-hour self-healing functionality
- Significantly reduced operational and maintenance costs
- Secure meter data transfer to the IESO through our Virtual Private Network

GENERATION SOLUTIONS

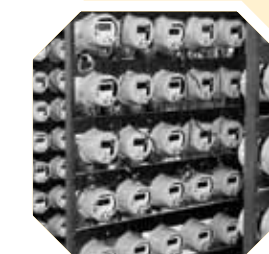

Horizon has metering solutions for the Ontario Power Authority's Feed-in Tariff (FIT) Program, as well as for generation, both registered and non-registered with the IESO.

ACCURATE AND RELIABLE SERVICE

We provide dedicated customer service and rapid response times - most often the same day and always within 24 hours.

All our meter work is performed using metering devices and test equipment that is industry-approved and verified.

Our maintenance agreements can be all-inclusive for easy budgeting, or can be customized to suit your needs.

MEASUREMENT CANADA ACCREDITED METER SEALING

Horizon offers meter repair, calibration, programming, reprogramming, and sealing services. Our accreditation encompasses acceptance and compliance sample testing for both mechanical and electronic meters. Using our in-house state-of-the-art Electronic Metering Tracking System (EMTS), we can identify and track all meters 24/7.

We maintain multiple state-of-the-art Measurement Canada-certified test consoles.

* These certifications apply to Horizon Utilities Corporation.
